

Managing **HUMAN ELEMENT** of the **RISK**

“ ----- ”

In the digital world that drives us today, cyber criminals use advanced techniques to exploit humans.

----- ”

“ -----
A cyber attack happened
every **39** seconds and **89%**
of data breaches involve
the human element.
----- ”

Primary Reasons

Human Error

Employee falling
for a phishing
attack

Spear Phishing

Lack of awareness
of security policies
and processes

Are you frustrated with
employee related security
incidents?

Are you looking for a
comprehensive solution for
tackling human cyber risk?

“ The traditional route of one-per-year security awareness training to satisfy compliance and contractual obligations is not enough to protect today’s businesses against evolving cyber threats. ”

Saas Based Human Risk Management Solution

A one-of-a-kind solution that can help you in transforming your employees from the 'weakest link' into a strong human firewall.
